

WRIST MEASURING TOOL

IMPORTANT: This page should be printed at 100% size.
Do not resize or scale to fit.

Before you start please verify these measurements

0 1cm 2cm

1

Take the scissors and cut out the size guide.
Make a cut on the square area.

2

Place the watch dial on top of your wrist and wrap the ruler fully around making sure it is not too tight. If you prefer to wear your watch looser, please take this into account when measuring.

3

Read the number that lines up with the cut. Use this number to select the closest option from the "Bracelet Size" option. Please note that we will size your watch to the measurement provided.
